

# Trigonox 263 Red

Methyl ethyl ketone peroxide and cumyl hydroperoxide, solution in 2,2,4-trimethyl-1,3-pentanediol diisobutanoate

Pre-blended initiator with a Red Indicator System used for curing unsaturated polyester, vinylester and acrylic thermosetting resins at ambient conditions in conjunction with a metal salt.

**CAS number**

1338-23-4; 80-15-9

**EINECS/ELINCS No.**

215-661-2; 201-254-7

**TSCA status**

listed on inventory

## Specifications

Active oxygen

8.8-9.2 %

Appearance, 20-25 °C

Red liquid, no insoluble matter

## Applications

Trigonox 263 Red is a convenient pre-blended initiator suitable for curing unsaturated polyester, vinyl ester and acrylic thermosetting resins at ambient conditions in conjunction with a metal salt. Trigonox 263 Red produces lower exotherms than standard MEKPs and is useful in warm and hot weather climates. Applications include cast polymer and laminates. Additional end-use information is available in Nouryon's application brochures.

## Thermal stability

Organic peroxides are thermally unstable substances, which may undergo self-accelerating decomposition. The lowest temperature at which self-accelerating decomposition of a substance in the original packaging may occur is the Self-Accelerating Decomposition Temperature (SADT). The SADT is determined on the basis of the Heat Accumulation Storage Test.

SADT	60°C (140°F)
Method	The Heat Accumulation Storage Test is a recognized test method for the determination of the SADT of organic peroxides (see Recommendations on the Transport of Dangerous Goods, Manual of Tests and Criteria - United Nations, New York and Geneva).

## Storage

Due to the relatively unstable nature of organic peroxides a loss of quality can be detected over a period of time. To minimize the loss of quality, Nouryon recommends a maximum storage temperature (Ts max.) for each organic peroxide product.

Ts Max.	30°C (86°F)
Note	When stored under the recommended storage conditions, Trigonox 263 Red will remain within the Nouryon specifications for a period of at least 3 months after delivery.

## Packaging and transport

Trigonox 263 Red is packed in non-returnable 1 gallon polyethylene containers of 8 lb net weight (4 per case) and in non-returnable 5 gallon polyethylene containers of 40 lb weight. Both packaging and transport meet the international regulations. For the availability of other packed quantities contact your Nouryon representative. Trigonox 263 Red is classified as Organic peroxide type D; liquid, Division 5.2; UN 3105.

## Safety and handling

Keep containers tightly closed. Store and handle Trigonox 263 Red in a dry well-ventilated place away from sources of heat or ignition and direct sunlight. Never weigh out in the storage room. Avoid contact with reducing agents (e.g. amines), acids, alkalis and heavy metal compounds (e.g. accelerators, driers and metal soaps). Please refer to the Safety Data Sheet (SDS) for further information on the safe storage, use and handling of Trigonox 263 Red. This information should be thoroughly reviewed prior to acceptance of this product.

## Major decomposition products

Carbon dioxide, Water, Acetic acid, Formic acid, Propionic acid, Methyl ethyl ketone, Acetophenone, 2-Phenylisopropanol, Methane
